Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2621

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 13-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to describe the spatial coherency (SC) in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

It is noted that the spatial coherency is described in the specification from page 8, line 24 thru page 10, lines 6. Many variables are used to define the spatial coherency (SC). However, these variables are not described in such a way as to enable one skilled in the art to and/or use the invention. In particular, the variables COH_Ci, VISITED PELp, TOTAL_NUM_COHERENT, COLOR_OF_MASKED_PIXELk, TOTAL_NUM_COHERENT ++ are not clearly described. Please explain those variables. For example, on page 9, lines 8 of the specification, it is unclear as to what is meant by VISITED PELp = FALSE. On page 9, lines 19-23, the specification states "[f]or the whole pixels PELj in the region R ...the PELj is adjusted to the center of the CCM for the following operations". Why VISITED_PELj is both FALSE and TRUE?

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
